

Say Hi! at Check-In Desk

Parent note: This is where you will check in your child, update health history information, or update any changes to your family file (i.e. address, insurance, etc).

LISTEN for your name and play a **GAME!**

Parent note: Your child may play a game in our waiting room until an assistant calls his or her name at their special appointment time.

Pick a NEW toothbrush!

Parent note: Now your child will have a chance to pick a new toothbrush to take home with them. Encourage them to choose their FAVORITE color! We have plenty to choose from.

Take pictures of your teeth!

Parent note: Taking X-rays on your child is a very important part of his or her visit. Our assistants have the utmost patience and plan to make this step as easy as possible. Radiation concerns are normal to have. Don't worry, our assistants are prepared to answer any and all questions! *Radiation comparison chart available upon request*

Lay back in the chair

Parent note: Laying back in the chair ensures the best cleaning your child can receive. Our hygienists are prepared to accommodate any needs your child may have. No need to worry if your child is too nervous or unable to lay back right now, everyone is different! We will do our absolute best to make your child feel excited and happy about their visit with us today.

Time to Clean your teeth!

Parent note: You will accompany your child to their own private room for his or her cleaning. We understand that some loud noises and sounds may upset your child, so we have provided a safe and secure environment for them to ensure a stress-free visit with us. Netflix and headphones are available if your child would enjoy watching TV while we clean their teeth!

Look at the special tools they will use!

Count your teeth with the Doctor!

Parent note: For this step, Dr. Rubin will look at your child's x-rays, if any, and complete a full mouth exam to make sure there are no cavities or areas of concern. If brushing is difficult at home, Dr. Rubin can also give you some great tips on how to make brushing easier (and more fun!) for your child.

Paint on tooth vitamins

Parent note: Fluoride, better known as “tooth vitamins” in our office, is essential in fighting against cavities! We use a varnish rather than a gel, and apply it to your child’s teeth using a small brush. Unlike gel fluoride, our varnish allows your child to eat or drink immediately after their appointment. (The varnish may feel sticky or wax-like after being applied.)

Pick up your gold coin and say Goodbye!”

Parent note: At the end of your child’s appointment, your assistant will accompany you to our check-out window. There, you may schedule your child’s next cleaning, or any other appointment that they may need. Don’t forget to grab their special gold coin for the prize machine!

Choose your special prize!

**Parent note: Your child did great and we want them to know it. Help them pick out a special prize for a job well done!
See you next time!**
